

# About Advantage Technical Resourcing

Advantage Technical Resourcing provides qualified engineering, IT, scientific and R&D associates to customers around the globe. While technical positions aren't always easy to fill, we've made it more efficient by working closely with customers early in the process to determine their precise needs. We then review our database of on-demand associates to identify the best matches—first looking locally, then as far afield as needed. By fully understanding the skills required and having a large pool of qualified associates available, Advantage Technical Resourcing is able to greatly reduce the time needed to identify, interview and place great candidates.

## Statistics at a Glance

- ▲ We operate an ISO 9001:2008 accredited Quality Management System
- ▲ ITAR US Government Certification (International Traffic in Arms Regulations)
- ▲ Top 1% of the largest engineering staffing organizations in the US
- ▲ GSA Schedule (PES)

## The Advantage Technical Resourcing Blueprint

When it comes to staffing technical projects, the right hire can ensure that projects are completed on time and budget with breakthrough results. Projects may need contributions from mechanical engineers, software professionals and environmental scientists from around the globe. Advantage Technical Resourcing has the infrastructure needed to meet these demands.

Our organization includes divisions dedicated to every major technical field, and our infrastructure allows us to communicate seamlessly—across divisions and oceans—when staffing complex projects. As a result, we can efficiently accommodate all of a company’s technical staffing needs at once—from single, specialized professionals to complete, turnkey projects. That kind of efficiency is just one of our many assets.

- **The perfect fit:** Because our team members are experienced with every major technical discipline, our customers don’t have to settle for “mostly” qualified candidates. We don’t stop until we’ve found the right resources for a project, whether it’s a single civil engineer or a team of network administrators.
- **Wide-ranging support services:** Our team members work hard to keep you in compliance with all government regulations, and we advise companies every day on how to efficiently deploy their personnel to the far corners of the globe. We also collaborate with our customers on design and management projects, and can provide the project manager or the entire team.
- **Working together:** Advantage Technical Resourcing works closely with Advantage xPO, Advantage Professional and Advantage Staffing, giving our customers access to a wide range of skilled talent and product offerings, all accessible through a single contact.

## Global Reach

**Advantage Technical Resourcing** is one of four worldwide business groups (along with Advantage xPO, Advantage Professional and Advantage Staffing) under the Advantage brand. Together and independently, the Advantage business groups offer a global presence, with offices throughout the U.S., U.K. and Japan, plus satellite offices in Australia, Poland, Dubai and China. As a result, we’re able to not only find the perfect candidate for a job 8,000 miles away, but we can help our customers work through a variety of international employment challenges, such as immigration, worker mobility issues, cultural anomalies and currency conversion.
